The TMSS Medical College and Rafatullah Community Hospital Thengamara Bogra has inaugurated an artificial arm and leg attachment center on Saturday, October 10, 2020. The center was inaugurated by prominent social worker Shirin Khan. Former President of Rotary Club of Ramna Dhaka Rotarian Ashekul Islam, Founder Executive Director of TMSS Prof. Dr. Hosne Ara Begum, Deputy Executive Director-2 of TMSS Rtn. Dr. Md. Matiur Rahman, Health Sector Executive Adviser Prof. Dr. Moudud Hossain Alamgir Pavel, TMSS Advisor Md. Izar Uddin and others addressed the discussion before the inauguration ceremony. Social worker Yasmin Islam, Sumaiya Islam, Co-ordinator of Prosthetic Hand & Foot Attachment Center Assistant Professor Dr. Md. Shahrul Islam and doctors and senior officials of different departments of TMSS Medical College and Rafatullah Community Hospital were present. Md. Ataur Rahman Shafiq, the head of the center, presented the details of the artificial arm and leg attachment center through a multimedia presentation in front of the guests.

Speakers at the event said that this is the first artificial arm and leg attachment center in North Bengal. Through which people who have lost an arm or leg due to an accident or any other reason will be able to get an artificial limb attached from this center at very low cost. The rate of road accidents is higher in North Bengal. As the people of this area are financially weak, it is not possible for most of them to go to Dhaka and get artificial limbs. So, many of them have to accept paralyzed life for rest of their life. As the main breadwinner of the family became crippled, darkness descended on the whole family. The launch of the center at TMSS Medical College and Rafatullah Community Hospital will alleviate the suffering of these families. The people of this region will be benefited. This is a humane and noble work.

Note that this artificial limb center was launched with the financial support of Rotary Club of Ramna and their international partner Rotary Club of Ilsan Jayaro Republic of Korea. The attachment of prosthetic leg of Vijay Raj Nantu, who lost his leg in a road accident, was successfully done on the very first day at the center.
